RESOLUTIONS

Economic Resolutions for the Developing World

... emphasis on programs that advance economic sustainable countries.

... emphasis on the Strategic Plan "Advancing for the IAU" as a reference for the IAU in the coming decade.

... emphasis on using the IAU to determine which activities are advancing economic

RESOLUTION #1, of

1. The International Union of Pure and Applied Chemistry (IUPAC) is the only organization that has the authority to name elements.

2. The International Union of Pure and Applied Chemistry (IUPAC) is the only organization that has the authority to name elements.

RESOLUTION #2

1. The International Union of Pure and Applied Chemistry (IUPAC) is the only organization that has the authority to name elements.

2. The International Union of Pure and Applied Chemistry (IUPAC) is the only organization that has the authority to name elements.

# FROM EARTH TO THE Universe

**A Visual Journey Through the Cosmos**

In 1989, the Hubble Space Telescope was launched into space. The observatory has since taken the most detailed images of the universe that we can see. It has helped us understand our place in the universe and has shown us that there are billions of galaxies out there. It has also shown us that the universe is expanding and that it has a beginning.

**A few words about climate**

The Earth's climate is changing. This is due to the greenhouse effect, which is caused by the release of greenhouse gases into the atmosphere. These gases trap heat and cause the Earth to warm up. This is leading to a rise in sea levels, more extreme weather, and the melting of glaciers and ice sheets.

**A few words about space**

Space exploration is a way of learning more about the universe. It has helped us understand our place in the universe and has shown us that there are billions of galaxies out there. It has also shown us that the universe is expanding and that it has a beginning.

From Earth To The universe Exhibit, Oxford, UK, 27.08.09

International Conference of Young Astronomers, Cracow, Poland, 07.09.09

Star Party, Blackfoot Crossing Historical Park, Canada, 12.09.09

Astrophotography Exhibition, Fleming College, Ontario, Canada, 17.09.09

FETTU in the Iranian Parliament, Iran, 27.09.09

Planetarium Show, Bristol, UK, 30.09.09

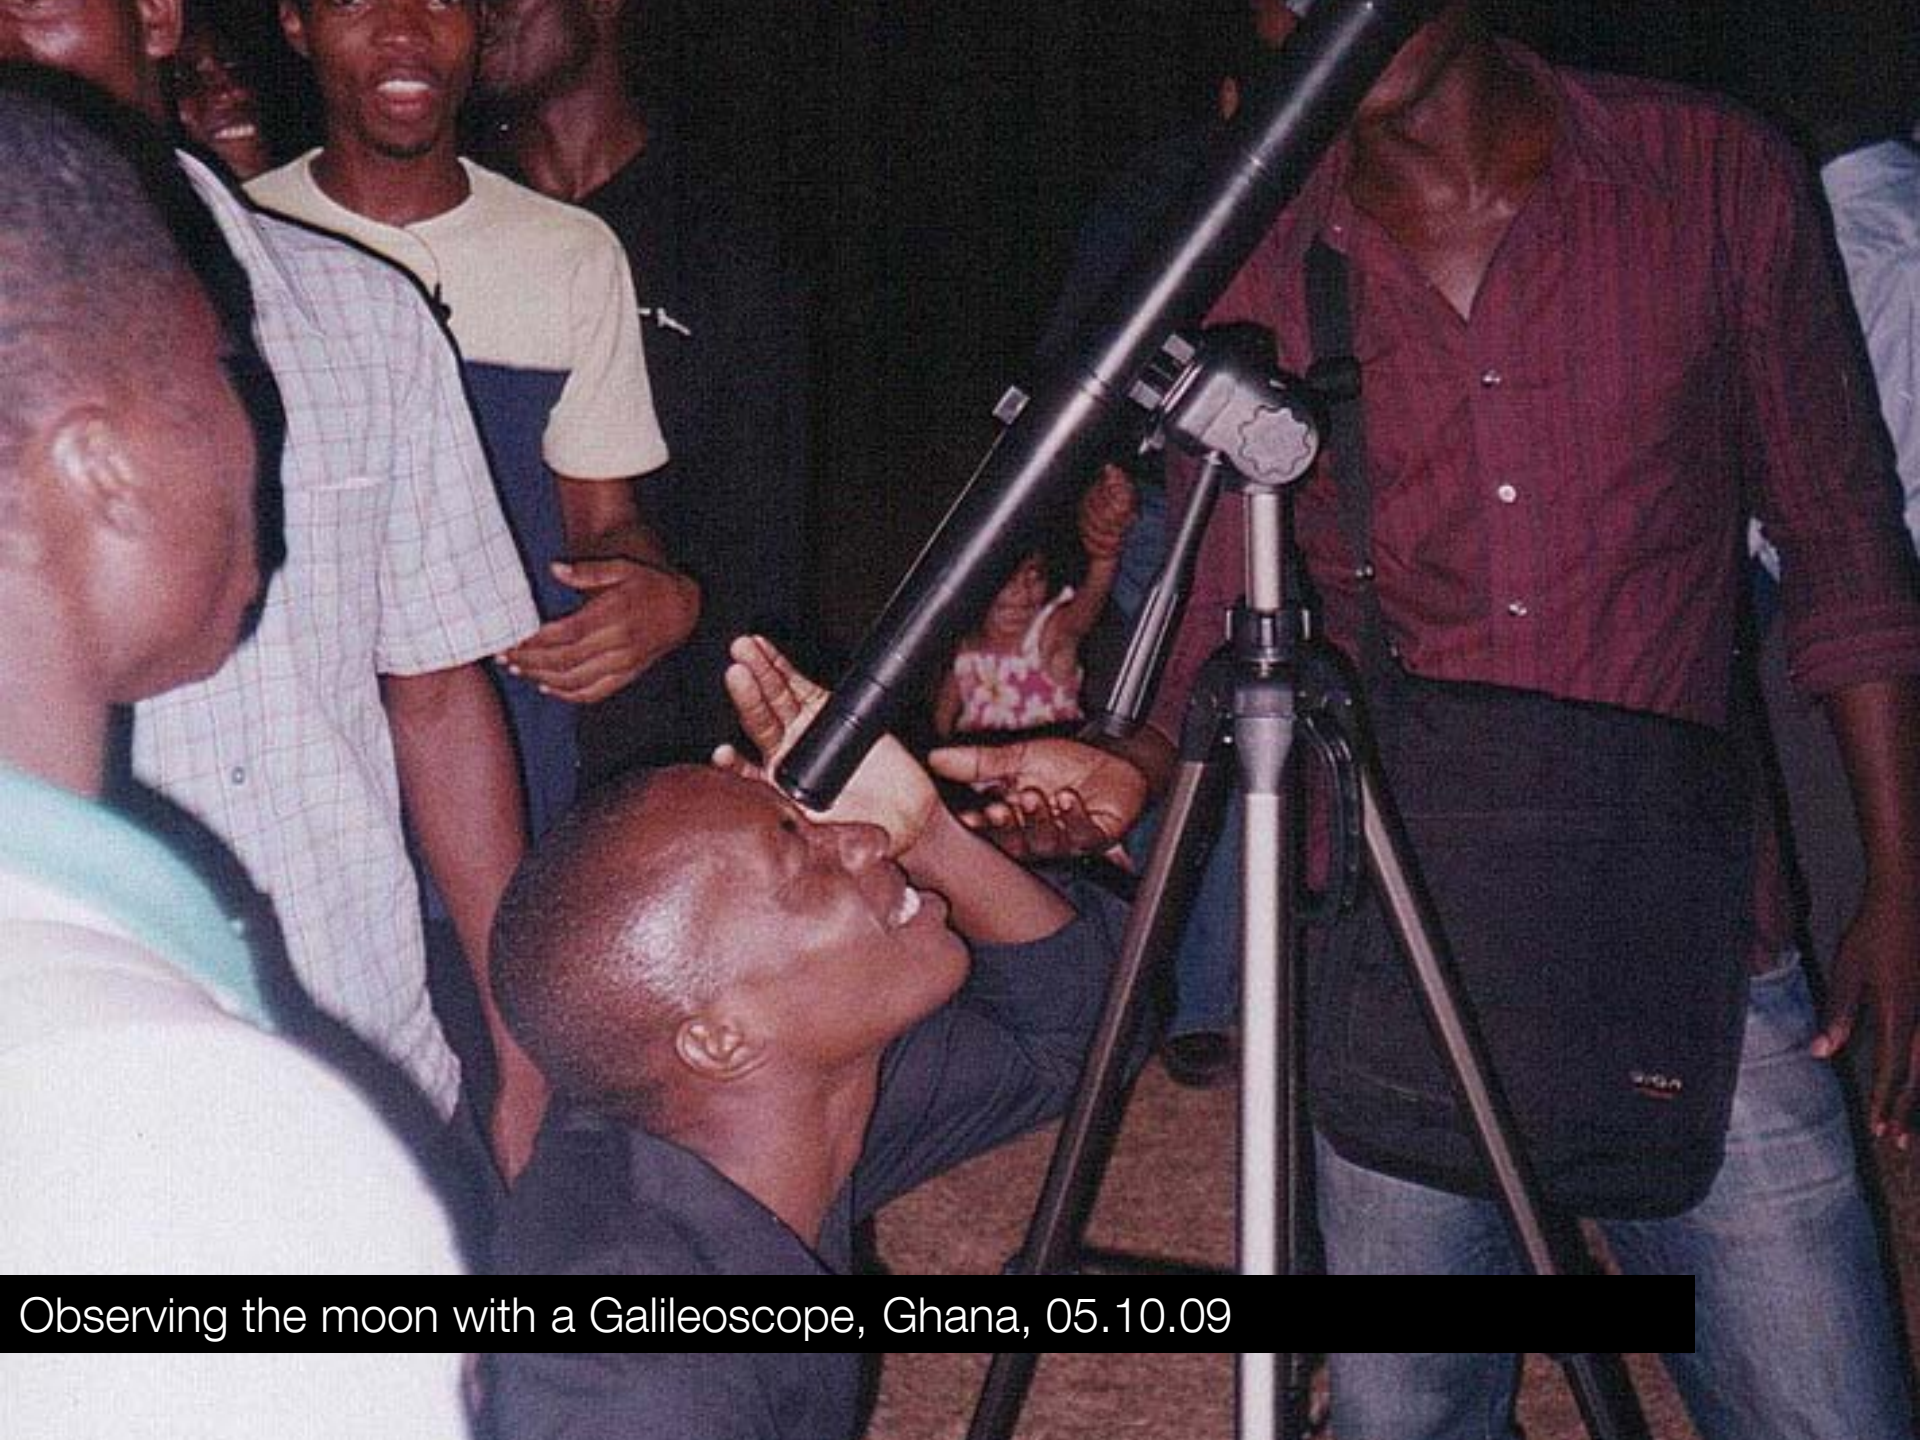

Astrophotography, Nagano, Japan, 04.10.09

World Space Week 2009 presentation, Enayetpur, Bangladesh, October 2009

Observing the moon with a Galileoscope, Ghana, 05.10.09

Colombian IYA2009 Ceremony, Colombia, 11.10.09

Primary School Science Event, Kazim Karabekir, Turkey, 22.10.09

Galilean Nights, Kazim Karabekir, Turkey, 22.10.09

Galilean Nights, Macclesfield, England, 23.10.09

Galilean Nights, Calcutta, India, 24.10.09
